

The New Standard for Railroad Tank Car Cleaning

RailX is formulated to expedite the cleaning of railroad tank cars, primarily focusing on a circulation system that can eliminate the need to place personnel inside the car.

RailX safely and effectively penetrates, dissolves and removes:

- > Heavy oils
- > Asphalt
- > Crude
- > Wax
- > Fuel Products
- > LEL
- > H₂S

Product Characteristics

- > Fully Organic
- > Non-toxic
- > Non-corrosive
- > High solvency strength (106 kb)
- > Replaces water based products and hazardous cleaners

Effluent

Used RailX should be evaluated for resale to fuel blenders based upon its BTU value.

Reduces concerns about Safety, the Environment and Regulations.

RailX Advantages

- > Allows for cleaning without entry
- > Easily filtered, extending its use for multiple tank cars
- > Effective at ambient temperature
- > Dries residue free
- > No water rinsing required

Contact BioChem regarding a typical layout of the cleaning system and equipment used in the process.

Available Sizes

- > 275-gallon totes
- > Bulk Transport
