

Destroys Coal Tar Sealer!

- > Contains No Glycol Ether EB
- > Non-Aqueous
- > Non-citrus formulation
- > High Flash point (145F)

Quick and Effective

Tarpedo quickly and effectively dissolves ready mix and concentrated coal tar sealers as well as:

- > asphalt
- > adhesives
- > cosmoline
- > latex residues
- > heavy grease and oil
- > other tough contaminants

Available in Convenient Sizes

- > One-gallon containers (four per case)
- > Five-gallon pails
- > 55-gallon drums

Specially Formulated

Tarpedo is specially formulated for the paving industry. Use Tarpedo to clean:

- > Coal tar sealer equipment
- > Asphalt and paving equipment
- > Hand tools
- > Maintenance vehicles
- > Other related equipment

Simple to Use

Tarpedo is simple to use.

Use full strength to remove ready-mix and concentrated coal tar sealers, asphalt, adhesives, grease, oil and other tough contaminants.

Protect plastic (Lexan), rubber, waxed and other similar surfaces from overspray. CAUTION: Product will damage surfaces like automobile headlights and tail lights. If product is sprayed on these surfaces, rinse immediately with soap and water.

Ideal for replacing

Ideal for replacing the following hazardous and toxic solvents regularly used in the paving industry:

- > Glycol ether EB
- > Mineral spirits
- > Diesel fuel and gasoline
- > Chlorinated solvents (TCE and methylene chloride)
- > Aromatic solvents

1. Apply Tarpedo directly to surface to be cleaned
2. Use cloth or rag to wipe surface clean
3. Rinse thoroughly with soapy water
4. Repeat as needed for heavy deposits
5. Clean up and dispose of any contaminated liquid or rags in accordance with local, state and federal requirements

Reduces Concerns

Reduces concerns about Safety, the Environment and Regulations.

Tarpedo is partially biodegradable and has minimal toxicity, reducing environmental impact and making it more friendly for workers than products that contain glycol ether EB and other hazardous solvents. It's the eco-friendly alternative to hazardous solvents.

With a flash point of 145F (TCC), Tarpedo is not considered hazardous for shipping by ground or air according to IATA and U.S. DOT regulations.
